Professional Summary

Informatics student at Universitas Sebelas Maret (UNS) with hands-on experience in software engineering, embedded systems, and visual design. Proficient in developing web, mobile, and game applications using Laravel, Next.js, and Kotlin, as well as programming microcontrollers (ESP32, CM-530) in C/C++ and Python. Active in robotics competitions and driven by a strong interest in Artificial Intelligence, Machine Learning, and Web3 technologies.

Education

Universitas Sebelas Maret (UNS) <i>Bachelor of Informatics (Computer Science)</i>	Aug 2024 – Jul 2028 Surakarta, Indonesia
MAN 1 Surakarta <i>Senior High School – Natural Sciences</i>	Jul 2021 – Jun 2024 Surakarta, Indonesia
MTsN 1 Surakarta <i>Junior High School</i>	Jul 2018 – Jun 2021 Surakarta, Indonesia

Experience

Senior Programmer – Team Sriwedari (KRSTI) <i>Robotika UNS, Surakarta</i>	Oct 2025 – Present 9 months
- Lead the software architecture and main control systems as PIC of the Programming Division. - Program CM-530 microcontrollers and integrate hardware actuators using Dynamixel servo systems. - Design hardware-software integration logic using C/C++ and Python to ensure optimal robot performance. - Coordinate technical execution with team members in preparation for national robotics competitions.	
Staff Programmer – Team Werkudara (KRAI) <i>Robotika UNS, Surakarta</i>	Oct 2024 – Sep 2025 1 year
- Wrote and debugged C/C++ codebase for robot's fundamental control and movement systems. - Contributed to early-stage sensor-to-microcontroller integration for autonomous navigation. - Collaborated in a fast-paced environment, adapting software to mechanical requirements under strict deadlines for the ABU Robocon competition.	
Staff Media – Syiar Kampus <i>JNUKMI UNS, Surakarta</i>	Feb 2026 – Present 5 months
- Design posters and manage the organization's Instagram feed for consistent branding. - Conceptualize social media content and create engaging graphics for informative visual communication.	
Jury Assistant – Line Follower Competition <i>FIRA Indonesia Open 2025 International Robosport Tournament</i>	Jun 2025 Solo Techno Park, Surakarta

- Managed technical preparation of the competition arena and handled precision timekeeping.
- Conducted technical inspections for approximately 20 participating teams, verifying robot specifications against official standards.

Skills

Programming Languages	C, C++, Python, PHP, JavaScript, Kotlin
Frameworks & Tools	Laravel, Next.js, Arduino/Dynamixel, ESP32, Git
Web & Mobile Dev	Web application development, mobile app development (Android/Kotlin)
Graphic Design	Poster design, social media content, branding & visual identity
Analytical Skills	Algorithm design, data structures, problem-solving, software architecture
Soft Skills	Team leadership, project coordination, attention to detail, fast learner

Certifications

- Typing Certificate of Achievement
- HackerRank SQL Certificate
- Belajar Penggunaan Generative AI – Dicoding
- Memulai Pemrograman dengan Python – Dicoding
- Revolusi Deployment: Bangun Website dengan AI Assist dan Deploy Instan Secure di EdgeOne

Honors & Awards

- **2nd Place** – Mathematics (MA/SMA), Kompetisi Sains Madrasah (KSM) City Level
- **3rd Place** – Mathematics Competition, SEMPOA 2023
- **4th Place** – ONMIPA-PT Mathematics, Universitas Sebelas Maret (University Level)

Languages

Bahasa Indonesia	Native or Bilingual
Javanese	Native or Bilingual
English	Professional Working Proficiency
Arabic	Elementary
